Vellum Scanned Demo

A synthetic mixed-layout fixture for OCR testing

This document is a deliberately mixed-layout sample used to test the OCR conversion path of Vellum. It contains one-column body text, a multi-column section, two tables, and embedded figures. The document was first typeset as a normal text-based PDF; every page was then rasterized at 200 DPI and the resulting bitmap was re-embedded as the only content of each page after going through a scanner-style degradation pipeline (slight skew, blur, sensor noise, grayscale, JPEG compression). The end result has no extractable text layer at all, which mirrors what a flatbed scanner would produce when scanning a printed copy.

Item	Quantity	Unit price	Subtotal
Notebook, A5	12	3.50	42.00
Pen, blue	48	0.80	38.40
Stapler	4	12.00	48.00
Paper, A4 ream	6	4.25	25.50

Multi-column section

Section	Status	Last updated
Introduction	Done	2026-04-08
Two-column body	Done	2026-04-08
Figures	Done	2026-04-08
Summary	In progress	2026-04-08

This concludes the Vellum scanned demo fixture. The original PDF (before scanning) had three pages with mixed layouts, two tables, two figures, and both single- and multi-column body text. After the rasterization and scanner-degradation step that produces the final PDF, every text glyph has been baked into a slightly noisy bitmap and the only way to recover the content is via OCR.
